Total labels (labels x location)	541										

Explanatory Notes

1. This list has been compiled in May 2009, by walking around the Reserve and recording the metallic brown plant name labels.
2. Not all plants in JB Reserve are labelled. JB Reserve contains many plants which are not on this list eg *Angophora costata*.
3. Over time, labels may be accidentally dislodged or covered up, or removed or mixed up through vandalism.
4. Over time, the botanical names of plants change. Some plant labels may refer to the old name of a plant.
5. Local to Sydney region: A plant is described as local if it is in Les Robinson's *Field Guide to the Native Plants of Sydney* (3rd edition 2003).
6. Location: The letters A, B etc refer to the labelled areas on the map in the JB Reserve brochure.
7. Common names are derived from several sources.

This list will be updated to reflect new labels. Check the website below for the most recent list.
