Plant Information Guide – The Plants We Grow

NB: IndigiGrow recommends caution when foraging for bush foods in the wild. Like fungi, there are native plants which although may look like they may be edible, are in fact highly toxic. The plants we grow are known to be edible or medicinal and are classified as safe to use in this regard.

ESBS = Eastern Suburbs Banksia Scrub

Native = General Native

Medicine = Medicinal Plant

Bush Food = Edible use

ESBS Companion Plant = Commonly found growing amongst Eastern Suburbs Banksia Scrub but not classified as Eastern Suburbs Banksia Scrub

Last Updated 5th November 2019

Grasses, Herbs, Flowers and Vines Up to 2 Metres

Common Name	Binomial Name	Description	Gardening Uses, Height & General Information
Flannel Flower	<i>Actinotus helianthi</i>	Insect attracting ESBS	Up to 50cm, full sun, white flowers, soft foliage
Albany Woolly Bush	<i>Adenanthos sericeus</i>	Bird & insect attracting Native	Up to 2 metres, full sun, drainage, soft textural leaves
Native Ginger	<i>Alpinia caerulea</i>	Edible Fruit, Leaves and Rhizome Bush Food	Up to 2 metres, clumping, fragrant, indoors, tropical, pots
Sea Celery	<i>Apium prostratum</i>	Edible Leaves Bush Food	Up to 40cm, part shade to filtered light, indoors, moist soils

Common Name	Binomial Name	Description	Gardening Uses, Height & General Information
Chocolate Lily	<i>Arthropodium strictum</i>	Edible tubers Bush Food	Up to 40cm, pretty flowers, rockeries, pots, bee habitat. Growing (Available early 2020)
Ten Corners Fruit	<i>Astroloma pinifolium</i>	Edible Fruit & Leaves Bush Food, ESBS	Up to 1 metre, pretty flowers, rockeries, replaces exotic conifers. Growing (Current stock is reserved for local Indigenous community members)
Midgem/Midyim Berry	<i>Austromyrtus dulcis</i>	Edible Fruit & Leaves (Eat Fresh, Tea) Bush Food	Up to 70cm, spreading, needs drainage, wind protected site shade to part-shade/morning sun, needs soil moisture for fruit, pots
Tall Midgenberry	<i>Austromyrtus tenuifolia</i>	Edible Fruit Bush Food	Up to 2 metres, needs drainage, wind protected site shade to part-shade/morning sun, needs soil moisture for fruit, large pots, hedges, fauna
Stout Bamboo Grass	<i>Austrostipa ramosissima</i>	Insect attracting Native	Up to 2.5 metres, moist gullies, drought tolerant once established
Heath Myrtle	<i>Baeckea imbricata</i>	Bird/fauna attracting ESBS	Up to 1 metre, white flowers, morning sun
Dog Rose	<i>Bauera rubioides</i>	Insect attracting ESBS	Up to 2 metres, full sun to filtered light, pretty pink flowers
Apple Berry	<i>Billardiera scandens</i>	Edible Fruit (Eat Fresh) Bush Food, ESBS	Up to 1 metre, Groundcover/climber, pots, indoors
Native Daisy 'Supreme Pink'	<i>Brachyscome 'Supreme Pink'</i>	Insect attracting Native	Up to 30cm, full sun, bright pink flowers
Blue Trumpet/Blue Yam	<i>Brunoniella australis</i>	Edible Root Bush Food	Up to 30cm, blue flower, root eaten like yam
Pink Purslane	<i>Calandrinia pickeringii</i>	Insect attracting Native	Up to 30cm, full sun, rockeries, pretty pink flowers, succulent
Nipan	<i>Capparis lasiantha</i>	Edible Fruit (Splits When Ready to Eat) Bush Food	Up to 2 metres, pretty white flower, hedge, full sun, butterfly habitat

Common Name	Binomial Name	Description	Gardening Uses, Height & General Information
Karkala, Pigface	<i>Carpobrotus glaucescens</i>	Edible Fruit (Eat Fresh When Red, Peel or Eat Whole) Bush Food, Medicine, ESBS Companion Plant	Up to 30cm, groundcover, spill over, full sun, pretty pink flowers
Karkala, Pigface (Vic, SA, Tas)	<i>Carpobrotus rossii</i>	Edible Fruit (Eat Fresh When Red, Peel or Eat Whole) Bush Food, Medicine	Up to 30cm, groundcover, spill over, full sun, pretty pink flowers, smaller leaves than <i>Carpobrotus glaucescens</i> . Growing (Available early 2020)
Native Grape	<i>Cayratia clematidae</i>	Edible Fruit Bush Food	Vine, part shade to morning sun
Yellow Buttons	<i>Chrysocephalum apiculatum</i>	Bee Attracting Native	Up to 30cm, full sun, drainage, pretty yellow flowers
Kangaroo Vine	<i>Cissus antarctica</i>	Edible Fruit Bush Food	Vine, shade to part shade, copper coloured new growth
Old Man's Beard	<i>Clematis aristata</i>	Bird attracting Native	Vine, shade to filtered light, fluffy white flowers. Growing (Available 2020)
Native Fuschia	<i>Correa reflexa</i>	Bird & insect attracting, Edible Leaves Bush Food, Medicine	Up to 1.5 metres, morning sun, leaves used for tea, pink/yellow flower in late Winter/early Spring, flower nectar (drink)
Swamp Lilly	<i>Crinum pedunculatum</i>	Insect attracting Native	Pretty white flowers, agapanthus alternative, shade to full sun, drought tolerant
Native Cymbidium Orchid (200mm pot size)	<i>Cymbidium suave</i>	Insect attracting Native	Up to 40cm, filtered light, indoors, yellow flower
Native Cymbidium Orchid (140mm pot size)	<i>Cymbidium suave</i>	Insect attracting Native	Up to 40cm, filtered light, indoors, yellow flower
Barbed- Wire Grass	<i>Cymbopogon refractus</i>	Insect attracting Bush Food, Native	Up to 1 metre, insect habitat, barbed wire shaped seed awns

Common Name	Binomial Name	Description	Gardening Uses, Height & General Information
Lemon-Scented Darwinia	<i>Darwinia citriodora</i>	Edible Leaves (Teas) Bush Food	Up to 2 metres, full sun to part shade, needs drainage, pretty pink flower, bee/bird habitat
Clustered Darwinia	<i>Darwinia fascicularis</i>	Edible Leaves(Teas) Bush Food, ESBS	Up to 1.5 metres, full sun, needs drainage, pretty pink flower, bee/bird habitat, edible leaves bubblegum flavour
Blue Flax Lily	<i>Dianella atraxis</i>	Edible Fruit (Eat Fresh) Bush Food	Up to 40cm, Morning sun to part shade, pretty flowers & fruit, rockeries, pots, indoor. Growing (Ready 2020)
Blue Flax Lily	<i>Dianella caerulea</i>	Edible Fruit (Eat Fresh) Bush Food	Up to 70cm, Morning sun to part shade, pretty flowers & fruit, rockeries, pots, indoor. Growing (Ready 2020)
Beach Flax Lily	<i>Dianella congesta</i>	Edible Fruit (Eat Fresh) Bush Food	Up to 50cm, Morning sun to part shade, pretty flowers & fruit, rockeries, pots, indoor
Blue Flax Lily	<i>Dianella longifolia</i>	Edible Fruit (Eat Fresh) Bush Food	Up to 80cm, Morning sun to part shade, pretty flowers & fruit, rockeries, pots, indoor
Blue Flax Lily	<i>Dianella revoluta</i>	Edible Fruit (Eat Fresh) Bush Food, ESBS	Up to 90cm, Morning sun to part shade, pretty flowers & fruit, rockeries, pots, indoor. Growing (Ready 2020)
Longhair Plume Grass	<i>Dichelachne crinita</i>	Insect attracting ESBS	Up to 1 metre, local alternative to Red Fountain Grass
Egg & Bacon Pea	<i>Dillwynia retorta</i>	Bird attracting ESBS	Up to 2 metres, morning sun to filtered light, yellow orange flowers
Prickly Rasp Fern	<i>Doodia aspera</i>	Insect attracting Native	Up to 35cm, filtered light, bathrooms
Gymea Lily	<i>Doryanthes excelsa</i>	Edible Flower Bush Food	Part shade or morning sun, up to 2 metres spread, drought tolerant once established, flower rich in nectar.
Ruby Saltbush	<i>Enchylaena tomentosa</i>	Edible Leaves Bush Food	Up to 1 metre, edible leaves, red berries energy boost
Fuchsia Heath	<i>Epacris longiflora</i>	Edible Fruit Bush Food, ESBS	Up to 1 metre, red pink flower, filtered light. Not Currently Growing
Devil's Marbles	<i>Eremophila debilis</i>	Edible Fruit Bush Food	Up to 30cm, drought tolerant, creeping groundcover, dry areas
Heath-like Eremophila	<i>Eremophila microtheca</i>	Insect attracting Native	Up to 1.5 metres, very rare in the wild, very strongly scented (reminiscent of the Aussie bush)
Wombat Berry	<i>Eustrephus latifolius</i>	Edible Fruit Bush Food	Vine, full sun to filtered light, edible berry

Common Name	Binomial Name	Description	Gardening Uses, Height & General Information
Knobby Club Rush	<i>Ficinia nodosa</i>	Sedge, cooking use Bush Food	Up to 1.5 metres, distinctive knobby seed capsule, water features, edging plant, modern gardens, pots
Scrambling Lily	<i>Geitonoplesium cymosum</i>	Edible New Shoots Bush Food	Vine, eat new stems like asparagus shoots, drought tolerant, filtered sun to shade
Germander Raspwort	<i>Gonocarpus teucrioides</i>	Insect attracting ESBS	Up to 35cm, part shade, bracts
Grey Spider Flower	<i>Grevillea buxifolia</i>	Bird attracting Native	Up to 2 metres, full sun to filtered light, grey/white flower
Juniper-Leaf Grevillea	<i>Grevillea juniperum</i>	Bird attracting Native	Up to 3 metres, tolerates clay soil, showy red flowers, full sun
Green Spider Flower	<i>Grevillea mucronulata</i>	Bird attracting Native	Up to 3 metres, morning sun, pretty green flowers
Pink Spider Flower	<i>Grevillea sericea</i>	Bird attracting Native	Up to 2 metres, full sun to filtered light, pink red flowers
Emu Berry	<i>Grewia latifolia</i>	Edible Fruit. Medicinal Leaves/Root Bush Food Medicine	Up to 2 metres, morning sun, drought tolerant, tasty berry, dysentery & diarrhoea medicine
Hairy Hakea	<i>Hakea gibbosa</i>	Bird attracting Medicine	Up to 3 metres, white flowers, full sun. Growing (Ready Jan 2020)
Dagger Hakea	<i>Hakea teretifolia</i>	Bird attracting Medicine, ESBS	Up to 3 metres, white flowers, full sun. Growing (Ready 2020)
False Sarsaparilla	<i>Hardenbergia violacea</i>	Refreshing Drink Bush Food Medicine	Vine, full sun, soils with drainage, purple flowers
Native Rosella	<i>Hibiscus heterophyllus (yellow)</i>	Edible Flowers Bush Food	Up to 2m, white to light pink flowers, drought tolerant when established, attracts birds & insects. Growing (Ready Nov/Dec)
Rosella (Northern Australia)	<i>Hibiscus sabdariffa</i>	Edible Fruit, Leaves, Flowers Bush Food	Edible leaf, flower & fruit. Full sun. Up to 2m
Homoranthus	<i>Homoranthus flavescens</i>	Insect attracting Native	Up to 1m, sheltered filtered light, showy yellow flowers, Japanese style gardens
Purple Pea Bush	<i>Hovea acutifolia</i>	Bird attracting Native	Up to 2 metres, dappled shade to full sun, soils with drainage
Dusky Coral Pea	<i>Kennedia rubicunda</i>	Bird attracting Bush Food	Vine/ground cover, shower pink/purple flowers

Common Name	Binomial Name	Description	Gardening Uses, Height & General Information
Muntries	<i>Kunzea pomifera</i>	Edible Fruit Bush Food	Up to 30cm, full sun, needs soil with drainage, fruit like a spicy apple very high in antioxidants, moderate water needs, white flower
Cushion Bush	<i>Leucophyta brownii</i>	Insect attracting Native	Up to 1 metre, coastal winds and salt tolerant but will also grow inland, needs drainage and full sun, yellow flower, silver white foliage, drought tolerant
Burrawang/ Native Cycad	<i>Macrozamia communis</i>	Insect attracting Native	Up to 2 metres, semi shaded/filtered light, drought tolerant
Swamp Honey-Myrtle	<i>Melaleuca squamea</i>	Bird attracting ESBS	Up to 2 metres, full sun, prefers moist soil, pretty pink flowers
Thyme Honey-Myrtle	<i>Melaleuca thymifolia</i>	Bird attracting Native	Up to 1 metre, pretty pink flowers, fragrant
River Mint	<i>Mentha australis</i>	Edible Leaves Bush Food	Up to 70 cm, full sun to filtered light, needs moisture
Fringed Heath Myrtle	<i>Micromyrtus ciliata</i>	Insect attracting ESBS	Up to 50cm, full sun, drainage
Murnong	<i>Microseris lanceolata</i>	Edible Root Bush Food	Up to 50cm, full sun, yellow flower. Growing (Available 2020)
Sweet Morinda	<i>Morinda jasminoides</i>	Edible berry Bush Food	Vine, full sun to part shade, fruit attracts birds
Native Juniper	<i>Myoprum insulare</i>	Edible berry Bush Food	Spreading groundcover, drought & fire tolerant, edible berry once ripe. Growing (Available 2020)
Creeping Boobialla	<i>Myoprum parvifolium</i>	Edible berry Native	Spreading groundcover, drought & fire tolerant, edible berry once ripe
Bridal Daisy Bush	<i>Olearia microphylla</i>	Insect attracting Native	Up to 2 metres, full sun, white flowers
Olearia 'Ghost Town'	<i>Olearia 'Ghost Town'</i>	Edible Leaves Bush Food	Up to 70cm, native thyme, complex taste, full sun, drought tolerant
Basket Grass	<i>Oplismenus aemulus</i>	Insect attracting Native	Up to 30cm, shade to filtered light
Cat's Whiskers/Java Tea	<i>Orthosiphon aristatus</i>	Edible Leaves Medicine	Up to 1 metre, medicinal leaves, pretty white flowers, part shade. Growing (Ready 2020)
Sago Rice Flower	<i>Ozothamnus diosmifolius</i>	Attracts insects Native	Up to 2 metres, pretty white flowers, insect attracting, drought tolerant
Bower of Beauty	<i>Pandorea jasminoides</i>	Attracts insects Native	Vine, hardy, pretty pink large tubular flowers, drought tolerant
Wonga Wonga Vine	<i>Pandorea pandorana</i>	Attracts insects Native	Vine, hardy, pretty white purple small tubular flowers, drought tolerant. Growing (Ready 2020)

Common Name	Binomial Name	Description	Gardening Uses, Height & General Information
Wild Geranium	<i>Pelargonium australe</i>	Insect attracting Native	Up to 50cm, full sun to filtered light, pink flowers
Nodding Geebung	<i>Persoonia nutans</i>	Edible Fruit (Endangered) Bush Food	Up to 2 metres, full sun to filtered light. Growing (Current stock is reserved for local Indigenous community members)
Pine-Leaved Geebung	<i>Persoonia pinifolia</i>	Edible Fruit Bush Food	Up to 2 metres, culturally significant, edible fruit, part shade to full sun. Growing (Current stock is reserved for local Indigenous community members)
Slender Knotweed	<i>Persicaria decipiens</i>	Edible Leaves Medicinal	Up to 1.5 metres, full sun to part shade, edible leaves & edible white pink flowers, likes moisture
Pale Knotweed	<i>Persicaria lapathifolium</i>	Edible Leaves Bush Food	Up to 2 metres, full sun to part shade, edible leaves & edible white showy flowers, likes moisture
Conesticks	<i>Petrophile pulchella</i>	Nectar Bush Food	Up to 3 metres, sheltered sunny location, needs drainage, decorative flower
Slender Rice Flower	<i>Pimelea linifolia</i>	Insect attracting ESBS	Up to 1 metre, white flowers. full sun, Currently Not Growing
Orange Thorn	<i>Pittosporum multiflorum</i>	Edible Fruit Bush Food	Up to 2 metres, dense bird habitat shrub, orange berry
Silver Plectranthus	<i>Plectranthus argentatus</i>	Edible Leaves, Insect attracting Bush Food, Native	1 metre high, full sun to dry shade, flowers attracts bees
Cockspur Flower	<i>Plectranthus parviflorus</i>	Edible Leaves, Insect attracting Bush Food, Native	Up to 70cm, full sun to part shade, blue flower, attracts bees
Tussock Grass	<i>Poa affinis</i>	Insect attracting Native	Up to 70cm, drought tolerant, insect attracting
Common Tussock Grass	<i>Poa labillardierei</i>	Insect attracting Native	Up to 1 metre, drought toerant, butterfly habitat plant

Common Name	Binomial Name	Description	Gardening Uses, Height & General Information
Grey Tussock Grass	<i>Poa sieberiana</i>	Insect attracting Native	Up to 70cm, drought tolerant, insect attracting
Dwarf Plum Pine	<i>Podocarpus spinulosus</i>	Edible Fruit Bush Food	Up to 50cm, part shade, need male/female for fruit (buy 3), plum fruit
Cut-Leaf Mintbush	<i>Prostanthera incisa var sieberi</i>	Edible Leaves, Medicinal Bush Food, Medicine	2m, part shade, moist soils, pink-purple flowers
Oval-Leaf Mintbush	<i>Prostanthera ovalifolia</i>	Edible Leaves Bush Food	Full sun to filtered light, up to 2 metres, pretty purple flowers
Creeping Saltbush	<i>Rhagodia spinescens</i>	Edible Leaves, Berries Bush Food	Up to 1 metres, creeping, salt tasting leaves & berries, habitat for lizards & birds
Rulingia	<i>Rulingia hermanniifolia syn Commersonia hermannifolia</i>	Insect attracting Native	Up to 30cm full sun, rockeries, large pots, Japanese gardens, flower like Hoya
Samphire	<i>Sarcocornia quinqueflora</i>	Edible Fruit Bush Food	Up to 20cm, boggy sites, needs salt to be added to water for taste, full sun
Dune Fan Flower	<i>Scaevola calendulacea</i>	Edible Fruit Bush Food	Up to 30cm, full sun to part shade, pretty blue fan flower, fragrant flower, edible berry
Hairy Fan Flower	<i>Scaevola ramosissima</i>	Insect attracting Native	Up to 30cm, full sun, purple flower, spread to 50cm
Beach Spinifex	<i>Spinifex sericeus</i>	Insect attracting Native	Up to 60cm, full sun, needs drainage
Five Corners Fruit	<i>Styphelia triflora</i>	Edible Fruit Bush Food, ESBS Companion Plant	Up to 2 metres, protected position, full sun, pink flowers. Growing (Current stock is reserved for local Indigenous community members)
Five Corners Fruit	<i>Styphelia viridis</i>	Edible Fruit Bush Food, ESBS	Up to 2 metres, protected position, full sun, green flowers. Growing (Current stock is reserved for local Indigenous community members)
Native Grape	<i>Tetragonia nitans</i>	Edible Fruit Bush Food	Vine, part shade/morning sun, blue/purple fruit
Botany Bay Spinach (Warrigal Greens)	<i>Tetragonia tetragonioides</i>	Edible Leaves Bush Food	Up to 30cm, shade & full sun tolerant, drought tolerant, spinach alternative

Common Name	Binomial Name	Description	Gardening Uses, Height & General Information
Kangaroo Grass	<i>Themeda triandra</i>	Edible Seed Bush Food	Up to 1 metre, drought tolerant, insect habitat
Kangaroo Grass 'Mingo'	<i>Themeda triandra</i> 'Mingo'	Edible Seed Bush Food	Up to 50cm, drought tolerant, insect habitat
Wild Parsnip	<i>Trachymene incisa</i>	Edible Root Bush Food	80cm high, slow growing, parsnip alternative, sandy soils, dainty white flowers attracts insects.
Native Violet	<i>Viola banksii</i>	Edible Flower Bush Food	Up to 20cm, shade to filtered light, indoors
Australian Bluebell	<i>Wahlenbergia stricta</i>	Insect attracting Native	Up to 30cm, pretty blue flowers, full sun
Coastal Rosemary	<i>Westringia fruticosa</i>	Insect attracting ESBS Companion Plant	1.5 metres, responds to pruning, insect attracting grey foliage
Small Grass Tree	<i>Xanthorrhoea minor</i>	Nectar Drink Bush Food	Up to 80cm (leaves), no trunk like most grass trees, flowers make a refreshing nectar drink & attract birds
Woolly Xanthosia	<i>Xanthosia pilosa</i>	Insect attracting ESBS	Up to 65cm, semi shaded, soft woolly leaves, cream flowers. Currently Not Growing
Sandfly Zieria	<i>Zieria smithii</i>	Insect repelling Native	Up to 2 metres, white flowers, fragrant flowers, leaves repel some species of insects (midges)

Shrubs, Small Trees and Hedge Plants 2 to 7 Metres

Common Name	Binomial Name	Description	Gardening Uses, Height & General Information
Coastal Wattle	<i>Acacia longifolia var sophorae</i>	Edible Seed Bush Food, ESBS	Up to 3 metres, full sun, bird/bee habitat
Parramatta Wattle	<i>Acacia parramattensis</i>	Edible Seed Bush Food	Full sun, 3-7 metres, bird/bee habitat. Not currently growing
Sweet-scented wattle	<i>Acacia suaveolens</i>	Edible Seed Bush Food, ESBS	Full sun to part shade, up to 2 metres, bird/bee habitat
Sunshine Wattle	<i>Acacia terminalis</i>	Edible Seed Bush Food, ESBS	Up to 6 metres, full sun, drainage

Common Name	Binomial Name	Description	Gardening Uses, Height & General Information
Prickly Moses	<i>Acacia ulicifolia</i>	Edible Seed Bush Food, ESBS	Full sun to part shade, up to 3 metres, bird/bee habitat Growing (Available early 2020)
Scrub She-Oak	<i>Allocasuarina distyla</i>	Bird Attracting ESBS	Up to 7 metres, important bird habitat
Native Gardenia/Yellow Mangosteen	<i>Atractocarpus fitzlanii</i>	Edible Fruit Bush Food	Up to 6 metres, sheltered sites, filtered light, scented flowers
Old Man Saltbush	<i>Atriplex nummularia</i>	Edible Leaves Bush Food	Up to 2.5 metres, silver leaves, hedges, garden accent plant, drought tolerant, will grow in part shade
Cinnamon Myrtle	<i>Backhousia myrtifolia</i>	Edible Leaves (Cooking, Teas) Bush Food	Up to 7 metres, needs drainage, wind protected site shade to part-shade/morning sun, pots, hedges, indoors
Wallum Banksia	<i>Banksia aemula</i>	Bird/fauna attracting ESBS	Up to 7 metres, full sun, cream flowers, important habitat tree
Heath-leaved Banksia	<i>Banksia ericifolia</i>	Bird/fauna attracting ESBS	Up to 7 metres, full sun, need drainage, honeycombe flowers, bird/bee habitat
Hairpin Banksia	<i>Banksia spinulosa</i>	Bird/fauna attracting Native	Up to 3 metres, full sun, honeycombe flowers
Little Kurrajong	<i>Brachychiton bidwillii</i>	Edible Seed (Coffee Substitute, Nut Flour) Bush Food	Up to 5m, full sun to part shade, pretty pink flowers, powerlines, small yards, drought tolerant, fauna
Breynia	<i>Breynia oblongifolia</i>	Edible Fruit, Bird attracting Native	Up to 3 metres, black edible fruit, currowong habitat plant
New South Wales Christmas Tree	<i>Ceratopelalum gummiferum</i>	Bird attracting Native	5 metres high, pretty red flowers, part shade to morning sun
Finger Lime (ungrafted, cutting)	<i>Citrus australasica</i>	Edible Fruit, Green (Elongated Limes) Bush Food	Up to 2.5 metres, full sun to part shade, butterfly habitat, screen/informal hedge
Finger Lime (ungrafted, cutting) (200mm pot size)	<i>Citrus australasica</i>	Edible Fruit, Green (Elongated Limes) Bush Food	Up to 2.5metres (less usually), full sun to part shade, butterfly habitat, screen/informal hedge

Common Name	Binomial Name	Description	Gardening Uses, Height & General Information
Finger Lime (ungrafted, seed) (200mm pot size)	<i>Citrus australasica</i>	Edible Fruit, Green (Elongated Limes) Bush Food	Up to 2.5 metres, full sun to part shade, butterfly habitat, screen/informal hedge
Finger Lime 'Rainforest Pearl' (PBR) (grafted)	<i>Citrus australasica</i> 'Rainforest Pearl'	Edible Fruit , Red (Elongated Limes) Bush Food	Up to 2.5 metres, full sun to part shade, butterfly habitat, screen/informal hedge
Desert Lime	<i>Citrus glauca</i>	Edible Fruit Bush Food	Up to 3 metres, marble sized limes, full sun, drought tolerant
Smyrell's Clausena/ Greg's Wampi	<i>Clausena smyrelliana</i>	Edible Fruit Bush Food	Up to 6 metres, endangered in wild, citrus taste, abundant fruit
Palm Lily	<i>Cordyline rubra</i>	Edible Fruit Bush Food	Up to 4 metres, pepper tasting berry, shade to morning sun, drought tolerant
Slender Palm Lily	<i>Cordyline stricta</i>	Edible Fruit Bush Food	Up to 5 metres, pepper tasting berry, shade to morning sun, drought tolerant
Cape Barren Tea, White Correa	<i>Correa alba</i>	Bird & insect attracting, Edible Leaves Bush Food, ESBS	Up to 3 metres, full sun, leaves used for tea, white flower, sea salt wind tolerant
Tuckeroo	<i>Cupaniopsis anarcardiodes</i>	Bird attracting Native	6 metres high, good street tree for powerlines, small shade tree, hardy, full sun to part shade
Davidson's Plum	<i>Davidsonia jerseyana</i>	Edible Fruit (Jams, sauces, cooking for sour contrast, high antioxidants) Bush Food	Up to 5 metres, light shade, drained but moist soil, narrow spaces. Currently Not Growing
Deeringia	<i>Deeringia amaranthoides</i>	Edible Fruit Bush Food, Medicine	Up to 5 metres, shade to full sun, long braches, pepper taste
Hop Bush	<i>Dodonea viscosa</i>	Insect attracting Native	Up to 3 metres, pretty seed capsules
Silver-Leaved Mountain Gum	<i>Eucalyptus pulverulenta</i>	Edible Gum (Manna) Bush Food	Up to 6 metres, attractive silver foliage. Growing (Ready early 2020)
Native Guava/Bolwarra	<i>Eupomatia laurina</i>	Edible Fruit Bush Food	Up to 5 metres, part shade, perfumed flowers
Sandpaper Fig	<i>Ficus opposita</i>	Edible Fruit, Leaves native sandpaper Bush Food	Up to 5 metres, sweet tasting fruit. Growing (Ready early 2020)

Common Name	Binomial Name	Description	Gardening Uses, Height & General Information
Red Cottonwood	<i>Hibiscus tilaceus rubra</i>	Edible Flower, Edible Leaves Bush Food	Up to 5m, full sun, red glossy foliage, soils with drainage
Tick Bush	<i>Kunzea ambigua</i>	Edible Leaves ESBS	Up to 3 metres, cream flowers, bird attracting. Growing (Ready early 2020)
Native Crepe Myrtle	<i>Lagerstroemia archeriana</i>	Bird attracting Native	Up to 7 metres, full sun, likes humidity, rare in wild
Prickly Tea Tree	<i>Leptospermum juniperum</i>	Bird attracting Native	Up to 3 metres, drought tolerant, various soil types, pretty white flowers
Tantoon	<i>Leptospermum polygalifolium</i>	Bird attracting Native	Up to 3 metres, drought tolerant, pretty white flowers likes draining soil
Lance Beard Heath	<i>Leucopogon lanceolatus</i>	Edible Leaves Bush Food	Up to 3 metres, part shade to full sun, pretty white flowers
Hillock Bush	<i>Melaleuca hypericifolia</i>	Edible Leaves Bush Food	Up to 6m, bee & bird attracting, menthol-bubblegum taste
Lime Berry	<i>Micromelum minutum</i>	Edible Leaves, Edible Fruit, Butterfly Host, Bird Attracting Bush Food	Up to 3 metres, full sun to part shade, fragrant flowers attract butterflies, fruits attract birds
Prickly Broom Heath	<i>Monotoca scoparia</i>	Edible Fruit Bush Food, ESBS	Up to 3 metres, full sun. Growing (Available 2020)
Bloodthorn/ Native Framgipani	<i>Ochrosia elliptica</i>	Medicinal Medicine	Up to 5 metres, whorled fragrant frangipani smelling flowers, glossy green leaves, attractive scarlet red fruit (medicinal only when treated)
Small-Leaved Plum Myrtle	<i>Pilidostigma rhytispermum</i>	Edible Fruit Bush Food	3-5 metres, shade loving, creeks, moist soils preferred, edible berry
Native Mulberry	<i>Pipturus argenteus</i>	Edible Fruit, Attracts butterflies Bush Food	Up to 6 metres, filtered light, needs soil moisture, frost tender, butterfly host, dies back in drought unless cut back, dioecious so 3 plants needed to ensure fruit
Smooth Psychotria/Turkey Bush	<i>Psychotria dapnoides</i>	Edible Fruit, Medicinal Bush Food, Medicine	Up to 3 metres, edible white fruit, shrub like
Molucca Raspberry	<i>Rubus moluccanus</i>	Edible Fruit, Medicinal Bush Food Medicine	Up to 10 metres, leaves used medicinally, sweet to sight acidic berry, full sun
Native Raspberry	<i>Rubus parvifolius</i>	Edible Fruit Bush Food	Full sun, up to 3 metres, sweet fruit, drought tolerant once established
Atherton Raspberry	<i>Rubus probus</i>	Edible Fruit Bush Food	Full sun, up to 10 metres, sweet large raspberries. Growing (Ready Nov/Dec)
Bauerella/ Yellow Aspen	<i>Sarcomelicope simplicifolia</i>	Edible Fruit Bush Food	Up to 18 metres, part shade, sweet fruit

Common Name	Binomial Name	Description	Gardening Uses, Height & General Information
Kangaroo Apple	<i>Solanum aviculare</i>	Edible Fruit, Medicinal Bush Food, Medicine	Up to 3 metres, 'Nurse' plant, attracts birds & bees, self seedling, fruit & leaves medicinal. Growing (Ready early 2020)
Necklacepod	<i>Sophora tomentosa</i>	Medicinal Medicine	Up to 3 metres, full sun, drought tolerant, birds/bees/butterflies, endangered in wild
Scentless Rosewood	<i>Synoum glandulosum</i>	Edible Fruit Bush Food	Up to 7 metres, shade to semi shade
Brush Cherry (Lilly Pilly)	<i>Syzygium australe</i>	Edible Fruit Bush Food	Up to 35 metres, full sun/part shade, edible fruit (jams), hedges
Apricot Satinash (Lilly Pilly)	<i>Syzygium fibrosum</i>	Edible Fruit Bush Food	Up to 10 metres, semi shade to full sun, similar to Riberry but more fruit (clove/cranberry taste), hedges
Plum Satinash (Powderpuff Lilly Pilly)	<i>Syzygium wilsonii</i>	Edible Fruit Bush Food	Up to 3 metres, semi shade/filtered light, showy flowers
Warratah	<i>Telopea speciosissima</i>	Nectar Medicinal/ Ceremonial	Up to 4 metres, moist soil with drainage, prune heavily after flowering, morning sun, large red flowers
Poison Peach	<i>Trema tomentosa</i>	Insect attracting Native	Up to 3 metres, bird attracting, pretty berry
Native Broom	<i>Viminaria juncea</i>	Insect attracting Native	Up to 6 metres, prefers moist soils, pretty yellow flowers

Tall Trees 7 Metres and Above

Common Name	Binomial Name	Description	Gardening Uses, Height & General Information
Smooth-Barked Apple Gum	<i>Angophora costata</i>	Bird attracting Native	Up to 25 metres, gnarled trunk/limbs, white flowers
Bunya Pine	<i>Araucaria bidwillii</i>	Edible Nut Bush Food	Long lived (up to 400 years), shade to full sun, deep soils, pots, indoors. Growing (Available late 2020)
Alexander Palm	<i>Archontophoenix alexandrae</i>	Bird attracting Native	Up to 15 metres, filtered light to full sun, replacement for Cocos Palm. NB: Native to north Queensland so this species for that region or indoors only
Aniseed Myrtle	<i>Backhousia anisata</i>	Edible leaves (Cooking, Teas – Aniseed) Bush Food	Up to 35 metres (less usually), shade/part-shade, pots, hedges, indoors

Common Name	Binomial Name	Description	Gardening Uses, Height & General Information
Lemon-Scented Myrtle	<i>Backhousia citriodora</i>	Edible Leaves (Cooking, Teas) Bush Food	Up to 20 metres (less usually), sunny spot with drainage, needs moisture in Summer, pots, hedges
Old Man Banksia	<i>Banksia serrata</i>	Bird/fauna attracting Native	Up to 16 metres, cream flowers, important habitat tree
Illawarra Flame Tree	<i>Brachychiton acerifolius</i>	Edible Fruit (Coffee Substitute, Nut Flour) Bush Food	Up to 35m, full sun to part shade, pretty red flowers, avenues, drought tolerant
Kurrajong	<i>Brachychiton populneus</i>	Edible Seed (Coffee Substitute, Nut Flour) and Leaves Bush Food	Up to 20 metres (usually 5 meters), white bell shaped flowers, drought tolerant, edible leaves (livestock)
Queensland Bottle Tree	<i>Brachychiton rupestris</i>	Edible Seed (Coffee Substitute, Nut Flour) Bush Food	20m, full sun, iconic ornamental tree, habitat for Harlequin Beetle, drought tolerant
Black Wattle	<i>Callicoma serratifolia</i>	Cultural, Insect Attracting Native	Up to 12 metres, attracts moths/butterflies, "wattle & daub" housing of colonial settlers
Swamp Sheoak	<i>Casuarina glauca</i>	Bird attracting Native	Up to 15 metres, cockatoo habitat, fast growing, full sun to part shade
Round Lime	<i>Citrus australis</i>	Edible Fruit (Equivalent Exotic Round Limes, Very Productive) Bush Food	Up to 20 metres (less usually), full sun to part shade, butterfly habitat, screen/hedge
Smooth Davidson's Plum	<i>Davidsonia johnsonii</i>	Edible Fruit Bush Food	Morning sun/part shade, up to 8 metres, very rare
Davidson's Plum (200mm Pot Size)	<i>Davidsonia pruriens</i>	Edible Fruit (Jams, sauces, cooking for sour contrast, high antioxidants) Bush Food	Up to 10 metres, full sun to part sun, drained but moist soil, narrow spaces, block window views of overlooking neighbours

Common Name	Binomial Name	Description	Gardening Uses, Height & General Information
Large-Leaved Native Tamarind	<i>Diploglottis australis</i>	Edible Fruit (Jams, sauces, cooking for sour contrast, high antioxidants) Bush Food	Up to 12 metres, shade to full sun but part shade preferred, rainforest effect, indoor, fauna
Small-Leaved Native Tamarind	<i>Diploglottis campbellii</i>	Edible Fruit (Jams, sauces, cooking for sour contrast, high antioxidants) Bush Food	Up to 30 metres, shade to full sun but part shade preferred, rare, rainforest effect, indoor, fauna
Koda	<i>Ehretia acuminata</i>	Edible Fruit Bush Food	Up to 18 metres usually less, attracts birds, edible yellow fruit, water till established, shade to part shade
Bangalay/Southern Mahogany	<i>Eucalyptus botryoides</i>	Bird attracting Native	Up to 30 metres, white flowers, variable soil types, full sun
Sydney Peppermint	<i>Eucalyptus piperita</i>	Bird attracting Medicine	Up to 20 metres, full sun to filtered light, scented leaves
Rock Fig, Desert Fig, Holy Fig	<i>Ficus brachypoda</i>	Edible Fruit Bush Food	Up to 8 metres, drought tolerant, revered by central First Nations people. Growing (Ready early 2020)
Sandpaper Fig	<i>Ficus coronata</i>	Edible Fruit, Leaves native sandpaper Bush Food	Up to 15 metres, shade to filtered light/morning sun, prefers access to water. Mulch
Rock Fig, Desert Fig, Holy Fig	<i>Ficus brachypoda</i>	Edible Fruit Bush Food	Up to 8 metres, drought tolerant, revered by central First Nations people. Growing (Ready early 2020)
Sandpaper Fig	<i>Ficus coronata</i>	Edible Fruit, Leaves native sandpaper Bush Food	Up to 15 metres, shade to filtered light/morning sun, prefers access to water. Mulch
Small-Leaved Fig	<i>Ficus obliqua</i>	Edible Fruit Bush Food	Up to 60 metres, bird and fauna habitat, one of the sweetest tasting native fig fruits, does well in large pots
Pink Lime Berry	<i>Glycosmis trifoliata</i>	Edible Fruit Bush Food	Related to citrus, grows up to 8 metres, succulent pink berries, white fragrant flowers, host to swallowtail butterfly, full sun, hedge or screening
Wild Quice	<i>Guioa semiglauca</i>	Edible Fruit Bush Food	Up to 15 metres, coastal rainforest, sandy soil, bird and butterfly attracting, fragrant flowers
Tulipwood	<i>Harpullia pendula</i>	Bird attracting Native	Up to 20 metres, full sun to part shade, feature tree, attractive orange/red capsules with black aril
Cottonwood	<i>Hibiscus tilaceus</i>	Edible Flower Bush Food	Up to 15 metres, full sun, yellow edible flowers. Growing (Ready early 2020)

Common Name	Binomial Name	Description	Gardening Uses, Height & General Information
Kentia Palm/Lord Howe Island Palm/Parlour Palm	<i>Howea forsteriana</i>	Bird attracting Native	Indoor plant, grows to 18 metres outdoors, indirect light, water only when dry
Native Frangipani	<i>Hymenospermum flavum</i>	Bird attracting Native	Up to 20 metres (usually 5 metres), highly fragrant flowers, screening tree
Macadamia Nut	<i>Macadamia integrifolia</i>	Edible Nut Bush Food	Up to 10 metres, part shade to morning sun
Yellow Kamala	<i>Mallotus discolor</i>	Edible Fruit Bush Food	Up to 12 metres, dry rainforest, edible orange berries, attracts birds, fruit can be used for dyes, full sun to part shade, frost tolerant once established
White Feather Honey Myrtle	<i>Melaleuca decora</i>	Edible Leaves Bush Food	Up to 10 metres
Budjur (Gadigal), Snow In Summer	<i>Melaleuca linarifolia</i>	Edible Leaves Medicine	Up to 10 metres, full sun, showy white flowers, rich in essential oils
Prickly-Leaved Paperbark	<i>Melaleuca nodosa</i>	Bird attracting ESBS	Up to 10 metres, yellow flowers, hedge for coastal areas
Broad-Leaved Paperbark	<i>Melaleuca quinquenervia</i>	Bark, Bird attracting Bush Food (Steaming), Medicine	Up to 15 metres, full sun, cream flower, paperbark used for cooking, medicine and bird habitat
Pink Flowered Doughwood, Pink Euodia	<i>Melicope elleryana</i>	Bird & butterfly attracting Native	Up to 25 metres, stunning feature tree, light pink flowers, Ulysses butterfly host
Broad-Leaved Paperbark	<i>Melaleuca quinquenervia</i>	Bark, Bird attracting Bush Food (Steaming), Medicine	Up to 15 metres, full sun, cream flower, paperbark used for cooking, medicine and bird habitat
Pink Flowered Doughwood, Pink Euodia	<i>Melicope elleryana</i>	Bird & butterfly attracting Native	Up to 25 metres, stunning feature tree, light pink flowers, Ulysses butterfly host
Muttonwood	<i>Myrsine variabilis</i>	Edible berry Native	Up to 12 metres, part shade to full sun, pretty blue fruit
Queensland Nutmeg	<i>Myristica globosa</i>	Edible fruit Bush Food	Up to 15 metres, produces nutmeg similar to Solomon Island species, shade and warm microclimate needed for fruit, dioecious so buy 3 plants for fruiting
Hairy-Leaved Bolly Gum	<i>Neolitsia dealbata</i>	Edible berry Bush Food	Up to 12 metres, moist soil with drainage, shade to morning sun, edible berry
Long-Leaved Bitter Bark	<i>Pilodostigma triloculare</i>	Edible Fruit Bush Food	15 metres, full sun, sandy soil/drainage, edible berry

Common Name	Binomial Name	Description	Gardening Uses, Height & General Information
Gumbi Gumbi (200mm pot size)	<i>Pittosporum angustifolium</i>	Edible Leaves (Medicinal, Antiviral, Antibacterial, Studied for Cancer research) Medicine	Up to 12 metres, weeping form, decorative orange seeds, drought tolerant, replacement for weedy pepper & willow trees
Burdekin Plum (Guybalum)	<i>Pleiogynium timorense</i>	Edible Fruit Bush Food	Purple-black fruit, drought tolerant, up to 12m, feature tree, full sun/part shade. Growing (Ready mid 2020)
Brown Plum Pine	<i>Podocarpus elatus</i>	Edible Fruit Bush Food	Up to 10 metres, part shade/full sun, need male/female for fruit (buy 3), plum fruit
Black Apple	<i>Pouteria australis</i> <i>syn Planchonella australis</i>	Edible Fruit Bush Food	Up to 30 metres, morning sun to party shade
Bauerella/ Yellow Aspen	<i>Sarcomelicope simplicifolia</i>	Edible Fruit Bush Food	Up to 18 metres, part shade, sweet fruit
Queensland Firewheel Tree	<i>Stenocarpus sinuatus</i>	Insect attracting Native	Up to 40 metres, shade when young, morning sun when mature, showy red flower
Peanut Tree (200mm pot size)	<i>Sterculia quadrifida</i>	Edible Fruit Bush Food,	Up to 10 metres, full sun to part shade, edible fruit tastes like peanuts, flowers deciduously
Peanut Tree (140mm pot size)	<i>Sterculia quadrifida</i>	Edible Fruit Bush Food	Up to 10 metres, full sun to part shade, edible fruit tastes like peanuts, flowers deciduously
Whalebone Tree	<i>Streblus brunonianus</i>	Edible Fruit Bush Food	Up to 15 metres, shade top semi shade, drought tolerant
Weeping Lilly Pilly	<i>Syzygium floribundum</i> <i>syn Waterhousea floribundum</i>	Edible Fruit Bush Food	Up to 30 metres, full sun, weeping form, fruit (jams)
White Apple (Lilly Pilly)	<i>Syzygium forte</i>	Edible Fruit Bush Food	Up to 25 metres, full sun, edible fruit (jams), large leaves
Broad-Leaved (Lilly Pilly)	<i>Syzygium hemilamprum</i>	Edible Fruit Bush Food	Up to 30 metres, full sun, edible fruit (jams), large leaves
Riberry (Lilly Pilly)	<i>Syzygium luehmannii</i>	Edible Fruit Bush Food	To 30 metres, pruned as hedge, pots, tastes like cloves/cranberries. full sun to part shade
Rose Apple (Lilly Pilly)	<i>Syzygium moorei</i>	Edible Fruit Bush Food	Up to 40 metres, rare, white fruits on trunk, semi shade/filtered light
Roly Poly Satinash (Lilly Pilly)	<i>Syzygium unipunctata</i>	Edible Fruit Bush Food	Up to 6 metres, small pumpkin shaped fruit, enjoyed for wavy foliage

Common Name	Binomial Name	Description	Gardening Uses, Height & General Information
Mountain Pepper	<i>Tasmannia lanceolata</i>	Edible Leaves Bush Food	Up to 10 metres, dioecious (boy/girl needed), pepper tasting berry, grows in cool temperate rainforest locations (or areas that regularly snow/sleet with temperatures below zero degrees Celsius in Winter, high rainfall areas). Season ended for year
